Project Design Phase-I
Solution Architecture
TEAM ID : PNT2022TMID26872

Project Name	Smart Solutions For Railways

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridgesthe gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.

- Describe the structure, characteristics, behavior, and other aspects of thesoftware to project stakeholders.

- Define features, development phases, and solution requirements.

- Provide specifications according to which the solution is defined, managed,and delivered.
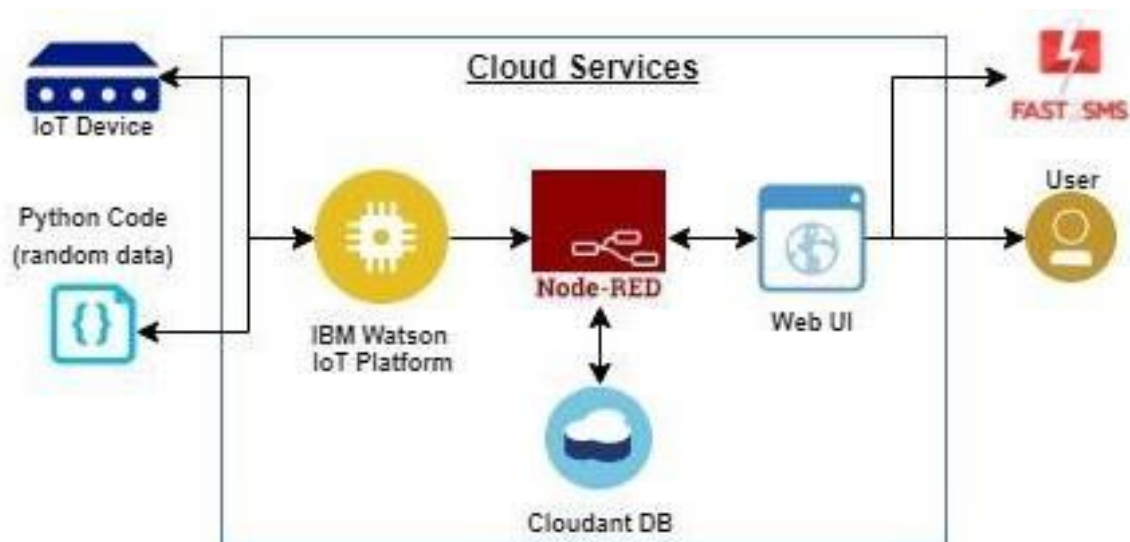

Example - Solution Architecture Diagram:
